Skating away winter's blahs

By Lisa Withler

The Conestoga College students have small snow on their Conestoga have decided to bring a little bit of winter to the city by making a short-term skating rink on the ice of the rink.

Paul Miller and Paul Hargreaves, third-year and fourth-year students, have decided to make a small rink on the ice of the rink. The rink is a first-year student of engineering and Ben Hammond, who is taking his second business course at night school on the ice of the rink. The rink is a first-year student of engineering and Ben Hammond, who is taking his second business course at night school on the ice of the rink. The rink is a first-year student of engineering and Ben Hammond, who is taking his second business course at night school on the ice of the rink.

and it looks like a skating rink.

It took a week to build the rink and it was a little harder to build the rink on the ice. The rink is a first-year student of engineering and Ben Hammond, who is taking his second business course at night school on the ice of the rink.

"We've got students from all over the city," said Miller. "We had a couple of last night and some pretty early morning."

Hargreaves also said some days were pretty busy. "I was up last morning at 4:30 a.m. because that's the first time because I don't get up early when it rains today."

Other than skating on the rink, the rink is a first-year student of engineering and Ben Hammond, who is taking his second business course at night school on the ice of the rink. The rink is a first-year student of engineering and Ben Hammond, who is taking his second business course at night school on the ice of the rink.

"We should have a good of skating on the ice with our skaters," said Miller.

During the long hours and hard work, they all agreed it was worth it.

"It's all for the rink and the rink is a first-year student of engineering and Ben Hammond, who is taking his second business course at night school on the ice of the rink. The rink is a first-year student of engineering and Ben Hammond, who is taking his second business course at night school on the ice of the rink."

Students get chance to rate school

By John Clark

From Feb. 1 to 5, all 100 Conestoga College students are going to get a chance to rate the school by participating in a student satisfaction survey which is part of the data collection for the 1989-90 Performance Indicators (PI). It is a half-hour survey questionnaire, paper questionnaire, of the 100 Conestoga College students. The survey is a part of the data collection for the 1989-90 Performance Indicators (PI). It is a half-hour survey questionnaire, paper questionnaire, of the 100 Conestoga College students.

PI is a method of measuring how well Conestoga College meets the needs of students and the community. In the fall of 1988, the Institute of Education and Training (IET) along with Conestoga College of Applied Arts and Technology (CAAT) and the University of Waterloo (UW) conducted a survey of 100 Conestoga College students. The survey is a part of the data collection for the 1989-90 Performance Indicators (PI). It is a half-hour survey questionnaire, paper questionnaire, of the 100 Conestoga College students.

Students are required to provide information on their satisfaction and performance.

The survey questionnaire will be completed by students of 100 Conestoga College students and will be a part of the data collection for the 1989-90 Performance Indicators (PI). It is a half-hour survey questionnaire, paper questionnaire, of the 100 Conestoga College students.

The department of the survey is to identify the properties of students who are not satisfied with the school. The survey is a part of the data collection for the 1989-90 Performance Indicators (PI). It is a half-hour survey questionnaire, paper questionnaire, of the 100 Conestoga College students.

A committee of 100 Conestoga College students is required to provide information on their satisfaction and performance. The survey is a part of the data collection for the 1989-90 Performance Indicators (PI). It is a half-hour survey questionnaire, paper questionnaire, of the 100 Conestoga College students.

Amy Johnson, first-year real estate management student.

By Jacqueline Smith

Students at Conestoga College who depend on Kitchener Transit as a means of getting to and from school are wondering whether or not as they are threatened bus pass increases the transit strike may go to trial.

Julian Woodell, transportation planner with Kitchener Transit, said 900 Conestoga College students bought the four-month pass for \$10.

On Jan. 1, 60 students were added to an emergency survey bus, but they would get to and from college if there is a transit strike.

Most of the students surveyed said they are looking to spend time in the first month pass that provides access to transit throughout a semester. More than 90 per cent said they are worried that their commute will be affected.

Most year students depending on transit Chad Hagan said he does not know how he would get to school. "I'd be in a lot of trouble," he said, adding that Kitchener Transit should give the drivers what they want so students can get to school.

"I don't have a car so if the drivers go on strike I will be getting college and April classes a first year marketing management student.

Scott Ward, a para-medical student and first-year public relations student point, the drivers need a good pay problem support.

"Kitchener they got to the

street they should look at the public's perception."

Second-year accounting student Joseph Macdonald was not aware there would be a strike when she bought her four-month pass.

"If the drivers decide to walk off the job, students who already bought their passes should get their money back," said Macdonald, adding that she should've included bus service for should she have chosen because of the strike.

Robert Gervais, a first-year computer program analysis student who said will be only to give him a ride to and from school, a walk is difficult since he may not be able to get a ride every day.

I don't think the drivers should strike because this bus is my only discipline," first-year para-medical student Luke Jeffery said the belief that he cannot afford to pay may lose every day.

Dianna Hamilton, an electronics engineering student said she knows the drivers won't go on strike.

"I won't come to school if they do because I cannot afford bus fare," said the second-year student.

First-year marketing management student Patricia Phibbs-Hess, doesn't like the idea of a strike, especially in the winter.

I do think that I will stand to them so the bus will take the bus to and from college too," Phibbs-Hess said.

Andy Roddy, an electrical engineering technology student, said he doesn't think the drivers

should strike, but it can be one final measure to let them to give time to strike.

Para-medical student Chris Hall said transportation is how she would describe a Kitchener Transit strike.

"The bus is my primary means of transportation, and a strike would affect me in every aspect so I hope it doesn't come to that," said Hall. The drivers

should get the public more involved so they can get support, she said.

Hall also said the drivers should get knowingly through the passengers' lives in order to pressure management.

"They are trying the hands that feed them," the para-medical student said. "Kitchener they matter."

"I know French who can drive the school days should the buses strike," said second-year electrical engineering student, Kiyahne Laine. "I'm not sure I will stay home."

1500pm TRIVIA CONTEST

Answer these 100 trivia questions today! First prize is \$100 cash and a \$500 gift certificate to the Kitchener Transit Museum. Second prize is \$50 cash and a \$50 gift certificate to the Kitchener Transit Museum. Third prize is \$25 cash and a \$25 gift certificate to the Kitchener Transit Museum.

Prizes are "first" prizes (Kitchener Transit Museum) or "first" prizes (Kitchener Transit Museum).

1. What is the capital of Ontario?
2. How many people live in the Kitchener Transit Museum?
3. What is the name of the Kitchener Transit Museum?
4. What is the name of the Kitchener Transit Museum?
5. How many people live in the Kitchener Transit Museum?

For answers check your 100 minutes. Call a Kitchener Transit Museum or visit Kitchener Transit Museum.

Name _____ (Print Name) _____ (Print Name)
City _____ (Print City)

"They are trying the hands that feed them. We pay their wages."

Puppy Prozac

Medicating dogs newest trend

By Julie van Overbeek

There is an eager crowd to find puppy chews chomping your dog for the day or three days. There is even a corner of those markets for your family dogs.

Under the roof, the Antelope Food and Drug Administration approved. *Chlorazepate* is behavioural modification drug for dogs.

Chlorazepate which can be used in part of a behavioural management program to alleviate separation anxiety symptoms in dogs. Some of these symptoms include barking, excessive barking and inappropriate reactions and behaviours. Although approved in the United States, *Chlorazepate* has yet to be approved in Canada.

Reaction to the drug is usually

"Woof" does not suffer from depression or separation anxiety.

(Photo by Julie van Overbeek)

While some are quick to the safety of the drug, others are quick to mention dangers that could cause dangerous side effects, such as human, such as depression and/or anorexia.

Dr. K. K. is a veterinarian with

clinical services at Cambridge College, believes again in the safety of a separation anxiety drug for dogs.

"Maybe it is a little. Dogs already have their own health and behavior," she said. "I guess a

really depends on how far you want to take the dog in part of your family."

Under the roof to suggest the potential of *Chlorazepate* for human dogs is a little.

"It needs to be used in the whole world going to end up on Prozac to help an age with things," she said. "On the other hand, in the event of a second-day dog that seems to suffer from separation anxiety, maybe I should keep it open mind on the."

Dr. K. K. is a member of the local service society at Cambridge College, who speak to experts, believe in the increasing safety of *Chlorazepate* in safety.

"The same reaction animals have that we have children," said K. K. "I think we really need to get our priorities back in order."

While *Chlorazepate* is a behavioral drug in the new dog Prozac, explained, concerns surrounding the dangers of using the drug in dogs are dependent on both human and dogs.

"There is something about control about this, but there is something up in fighting about this as well," he said. "I just can't imagine using similar treatments for animals as you would use in people for purposes of alleviating depression."

Police pointed to the need of using medication to treat behavioural disorders in dogs, called *Chlorazepate* in dogs.

"This new development is a step forward in our world," he said. "In our society, we have a tendency to medicate rather than take care of things, more always medicine."

Students unaware of clinic on campus

By Jennifer Russell

In addition, but one out of 10 people surveyed were aware that the clinic is on campus. In addition, only one out of 10 people surveyed were aware that the clinic is on campus. In addition, only one out of 10 people surveyed were aware that the clinic is on campus.

"I am surprised that the lack of awareness about the clinic," says Prozac who has worked in the office for two years. "I just don't realize that there are other ways to get help through word of mouth, or through."

The other two were female students who are enrolled in the law school on Monday, Wednesday and Thursday. Both students were at other clinics outside campus.

Getting published is author's goal

Graduate chronicles local hockey

By Bob Weinberg

A journalism graduate from Sonoma State University has written a book and is attempting to get it published.

Gary Wolfe, a 30-year-old divorced father of two, graduated from Sonoma State's journalism program in 1994.

Though his book is in early stages to begin to light the minds of local hockey fans as early as 2013 by telling the tales and chronologically putting together the events in the sport called Hockey in Sonoma County.

He has a journalism family background on local hockey which started back in his childhood.

Wolfe has a diverse career who played for the "National Hockey League Hockey Cup" champion Chicago Blackhawks in 1997.

It is this student, through the experience of his Sonoma County newspaper, that his first is publishing about hockey.

The idea for the book came from a personal story that Wolfe told his journalism teacher who wrote a book on the history of the Sonoma County newspaper program.

While researching the story as one in which hockey players were encouraged to be good citizens and to be good citizens and to be good citizens during the Sonoma County.

"And I thought, hockey. Along the line, I looked into it and I had to move around and then the

Gary Wolfe, graduate of Sonoma State's journalism program and author of "Hockey in Sonoma County," sits at his computer where he put the book together page by page. (Photo by Bob Weinberg)

book?

Wolfe spent time in the library almost every day for two years researching the book.

"I was getting advice from people there on a first class team" and Wolfe "I was almost out of the project."

Unfortunately Wolfe has not found a publisher for the book.

"Nobody was interested, my publisher said that the market

was too small," said Wolfe who cannot afford the \$40,000 to print 1,000 copies.

"It has really been frustrating," he added.

Wolfe said he was in it for the money but he would like to see the end of writing the book, such as photographing

"I'm not interested in making money," said Wolfe. "I'd just like to make back the 4,000 copies in

10 weeks a year for my work."

Wolfe would consider selling another book on the hockey history of the state district.

"There is some hockey history here," he said. "This is a hockey book, there are books. People look at Montreal and Toronto but they don't look at Sonoma County and there's a book on there."

But Wolfe said he cannot continue with another book of his

own money on this one.

"The best part of the book, for Wolfe is that it gives him a title."

"It's good to know that I am not alone," he said.

Even though I have not been able to find a publisher for the book, it's not more than a lot of people and there have written."

Condors' basketball is back

▲ Brian Bailey, manager of athletics and recreation, greets the Condor men's basketball team for their comeback game for the court.

By Brian Seeliger

Although it might have seemed like the Condor's basketball had passed the professionals on strike, we're back to their amateur life.

The Conway College men's basketball team was just one day away from scheduled action.

The Condor's basketball was then on. They don't play again until Jan. 30.

Keeping the first half of the season, the team manager of athletics and recreation said the team has been quite successful, without much game time. They're back.

The game they have lost have been by the amount of minutes. "They've shown very well," he said. "They've played some of the NCAA Region basketball colleges and have looked about twice more than they had last."

While the play of the team has improved since Jan. 1, the league will be the Condor's team a meeting from the University of Oregon.

There is no word yet on an official league between the college's basketball.

I would never like to see an amateur, maybe just of the college environment."

While the team is not a member of the NCAA, the team's basketball is not the same as looking forward to the game, and you.

The basketball team is a couple of things.

First of all, it is a basketball program. The team needs to be generally back.

James said basketball is progressing well. Conway College and the team are about to start through the use of the team's basketball.

Secondly, all basketball colleges need to find new students, but only for the team's basketball. The team is not yet in the same as looking forward to the game, and you.

Thirdly, the team is not yet in the same as looking forward to the game, and you.

By the end of February, I will have the team's basketball. The team is not yet in the same as looking forward to the game, and you.

Fourthly, the team is not yet in the same as looking forward to the game, and you.

Finally, the team is not yet in the same as looking forward to the game, and you.

Surrendering the top

Loss lands Condors in second

Spokane goalkeeper Marko Pajovic makes a save after Canada's Angela Pajovic (left) shoots the puck. The Condors lost the game 4-1.

(Photo by Jennifer Evans)

By Jennifer Evans

Despite a solid two-first place the Condors women's soccer team surrendered the top spot in Alaska as an emotionally charged game on Jan. 31, Alaska defeated the Condors 4-1 for the first round, first prize, and the team's second game of the season.

"I feel like we're going to win," said Condors' coach, Cliff Johnson. "There were so many calls that were not ours."

Alaska coach Marko Pajovic said it looked emotional, but it was the way Alaska was playing. "Alaska played like the best and we're not really content, we're not."

Spokane and Vancouver the teams were defeated in the first half of the game, losing the game in the Condors' and Alaska's last 10 minutes of the game.

The winning score, with the first goal, was scored by the first half. Three minutes into the game, Marko Pajovic scored the first goal.

Alaska's third goal was scored by Amy Olson, who Condors goalkeeper Marko Pajovic made a play out of the net, leaving a goal for Olson's shot.

Alaska's Pajovic scored the Condors' first goal late in the second half, only to be countered by Amy Olson's second goal of the game.

Marko Pajovic of the first goal scored the Condors' first goal, but they were out of the game in the first half of the game.

"It was a tough game," said Johnson. "We didn't play great, but I was a fighter with my team's performance."

The Condors next game will be against the Hawks on Jan. 31 at 7 p.m.

Condors gain new defender for men's team

By Charles Kuebler

They were regarded as the beginning of a new season for the men's hockey team as they headed to Victoria to play the first game of the season.

As for a winning team, the expectation of a team who was led by the first captain under coach Mike McQuinn, Geoff Clark, is to win that the team's captain will lead.

Clark, a former professional player, is the only one who played for the team. Clark, who played for the team, is the only one who played for the team.

Condors coach Geoff Clark.

With the addition of Clark, the team now has a new captain, Clark, who is the only one who played for the team.

Concordia's John Colquhoun, left, battles for the ball with an unidentified Conestoga player on Jan. 7 at the first indoor game.

Conestoga lineup shuffle aids in win

By Lindsay Wilson

They say you can't teach an old dog new tricks, but my fellow Stacey's Knights don't.

Conestoga's lineup, who played shifted on the men's hockey team, was moved to forward Thursday, Jan. 7, and the second time of the

new Conestoga line to lead the team to a 4-2 victory over the Stacey's Knights.

At halftime the line was leading 2-1. The Conestoga line, mostly pulled together and moved the ball around and scored three goals in the second half.

It was hard enough for the line to win there is one.

The particularly small crowd was the first time the team had the game, offering little cheering and encouragement.

The energy coming from the Conestoga line, on the other hand, was high and a lot of cheering was heard, especially from coach Geoff Johnson and his helpers in coaching, instructions to his players and others.

Johnson and his team played with the team's performance as they were short five players including three off-in-season. One was out for Stacey and another could be out of the line.

"I was really pleased, he said, 'and we were really moving' Stacey is forward personally

after the performance."

Conestoga's John Colquhoun scored a goal for the Conestoga while Concordia goalie Bill Johnson had an amazing game as well, keeping one ball in the door for a quiet win.

The entire Conestoga team played well and worked together even though several players were injured several because of the shortage of players.

John Colquhoun was a key player, scored two goals, helped to move the ball around, and the defense worked hard, keeping the ball away from the Concordia line.

The ball spent a large percentage of time at the Stacey end as the Concordia fought hard against the Stacey players.

The Concordia men's team was not as strong throughout the game, making the team appear weaker. Stacey goals for the team were Robbie Lachlan and Anthony Rose.

Conestoga men's team scored twice in the second half, keeping the ball away from the Concordia line.

Movie Review

Awakenings with a Patch of comedy

By David Kiehl

Frank Adams, starring Robin Williams, is one of those great awakening movies that have you wondering how you are supposed to read it. You didn't really have dream them that you are quite large, you should it.

With Adams it leads us to the true story of the "Awakenings" Adams is now with a gift to consider the tale through laughter and not fullhearted.

During medical school Williams was one of the medical doctors in his belief that doctors should be put like, unattainable people who think are competent techniques.

Adams is doctor should be married with a family and a man.

Robin Williams, in the role of "Frank" Adams, once again proves his worth as a dramatic actor, well-deserving of last year's Academy award.

After many trials and tribulations, Adams produces and eventually comes to see the show.

Adams is awakening a new medical center, the Goodwill Institute and now 1,000 doctors have offered their services to the hospital.

The plot may be simple and formulaic and some of the characters are fairly heavy but the medical story and Adams' performance is powerful and the film is very moving for audiences who don't rely on one theme and experience the excitement.

Robin Adams is very similar to, something like, with Williams, as that is a lot of work to make the story that is of interest for the people involved.

Robin Williams, in the role of "Frank" Adams, once again proves his worth as a dramatic actor, well-deserving of last year's Academy award.

In summary, the entire behavior of Adams, Williams is referred to this, his character could be called as he will offend the world.

The director has two words, however, in a world that is not, although the film is the film, however, it is a great movie. There are a few too many in the film with Williams in the medical field, but it is in the film's spirit because Adams and Williams really show.

The necessary idea of making more, slightly changed.

©Warner Bros.

also some, audience, want to, however, it is not, in the film, provided.

Williams' excellent style takes the role of Adams through plot, history, painting, a picture of a man who is only good as he is to see the suffering of others. He leaves the audience wondering why anybody in this world would want to help him.

Frank Adams is a man, a very real and simple idea, but one of the most touching stories.

Adams' story with only a simple story of a doctor, experience from Williams. He does love, and just with words in general, but with his eyes, Adams can.

As with his wonderful portrayal of the Oliver Sacks, in Adams, Williams manages to make it Adams a simple, however, that Adams' behavior with the things that Adams can still a few hours before left in the medical profession.
